1. UNDERSTANDING LED LIGHT PANEL

1.1 Definition of LED Light Panel

The unique construction of LED Light Panel harnesses a number of patented processes which unite to create an innovative lighting unit. Produced by combining high intensity LEDs with a patented 3D V-Cutting system, this process allows light to be transmitted uniformly and evenly across the acrylic surface of the unit.

A unified backlighting unit, LED Light Panel features thermally managed LEDs which are securely embedded inside an acrylic panel. This second patented process delivers a unit which is robustly constructed and easily installed in comparison to traditional backlighting units in which LED modules are fixed externally to an acrylic panel. Each LED Light Panel unit is manufactured in the UK to bespoke requirements.

1.2 Features and Benefits

Super slim: The thickness of LED Light Panel is 8mm (0.315")

Long lifetime and maintenance free: The longevity of LED Light Panel is more than 50,000 hours/11years at 12 hours a day.

Low power consumption and cost saving: LED Light Panel consumes up to 70% less power than T5 fluorescent lamps and up to 30% less energy than CCFL.

Eco-friendly product: LED Light Panel contains NO mercury or other hazardous materials.

Water resistant: LED Light Panel is available with an IP67 rating.

Bespoke sizes and shapes: LED Light Panel can be made into any shape and size up to 3000mm x 1200mm.

1.3 General Specifications

Item	Description	Remarks
Main Material	Acrylic (PMMA)	
Thickness	8mm	alternative thicknesses available
Power Supply	AC / DC 12V / 24V Adaptor	
Working Voltage	DC 12V / DC 24V	
Input Voltage	AC 100 ~ 240V 50/60Hz	
Lighting Source	3528 SMD TOP VIEW LED (8mm)	
Luminous Efficacy (LED)	80lm / W	
Power consumption (LED)	0.25W(Top View)	
Color Temperature (CCT)	3700K, 5300K	Other CCT is available
Max Size	3000mm(118") x 1500mm(59")	
Weight	Length(M) x Width(M) x Thickness(mm) x 1.19kg	
IP Rating	IP-67	Refer to below note
Lifetime	More than 50,000 hours	
Warranty on LED Light Panel	1 year	
Warranty on Acrylic	1 year	
Operating Temperature	5 ~ 35°C (41 ~ 95°F)	

Standard LED Light Panel has NO IP rating. LED Light Panel at IP-67 can be made upon special request.

2. 3D V-CUTTING TECHNOLOGY

2.1 3D V-Cutting Technology

A significant advantage to LED Light Panel lies in the production of the Light Guide Plate (LGP). Sourced for its rigidity and light transmission properties, a clear PMMA acrylic is etched with multiple grooves using patented 3D V-cutting technology to create a uniform matrix. This etched matrix acts as a vehicle to transport light from the unit's embedded LEDs across the entire surface of the panel to deliver homogeneous illumination.

2.2 Patent for V-cutting Technology

3.1 Light Guide Plate

3.1.1 Specifications

A backlight unit including a light source for emitting light through a light guide plate made of light transmittable acrylic. The light source is located on one or multiple sides of the light guide plate. The light guide plate is provided with a pattern of grooves to guide an optical path, scattering the light emitted from the light source.

3.1.2 Properties

4. ACCESSORIES & OPTIONS

4.1 Adaptor

60W AC-DC Single Output Desktop

Features:

- Universal AC input / Full range
- No load power consumption <0.3W
- Pass energy star (CEC) level IV for full series
- Meet energy star (CEC) level for V for 12~48V
- Meet ISA 2007 (Energy Independence and Security Act)
- 3 pole AC inlet IEC320-C14
- Class I power (with earth pin)
- Protections: Short circuit / Overload / Over voltage
- Over temperature
- Fully enclosed plastic case
- LED indicator for power on
- Approvals: UL / CUL / TUV / BSMI / CCC / CB / FCC / CE
- Pass LPS for full series
- 2 years warranty

Output	Safety Model No.	GS60A12
	DC Voltage	12V
	Rated Current	5A
	Rated Power (max.)	60W
Input	Voltage Range	90 ~264VAC 135~370VDC
	AC Current	1.4A / 115VAC 1A / 230VAC
Safety and EMC (Note. 3)	Safety Standards	UL60950-1, TUV EN60950-1, BSMI CNS14336, CCC GB4943 approved
	Withstand Voltage	I/P-O/P:3KVAC I/P-FG:1.5KVAC O/P-FG:0.5KVAC
	Isolation Resistance	I/P-O/P, I/P-FG, O/P-FG:100M Ohms / 500VDC / 25°C / 70% RH
	EMI Conduction and Radiation	Compliance to EN55022 class B, FCC PART 15 / CISPR22 class B, CNS13438 class B, GB9254 class B
	Harmonic Current	Compliance to EN61000-3-2,3, GB17625.1
	EMS Immunity	Compliance to EN61000-4-2,3,4,5,6,8,11, light industry level, criteria A
Notes	1. All parameters are specified at 230VAC input, rated load, 25°C 70% RH ambient. 2. DC voltage. The output voltage set at point measure by plug terminal and 50% load. 3. The power supply is considered a component which will be installed into final equipment. The final equipment must be re-confirmed that it still meets EMC directives.	

4.2 Spider Connector Cables

4Way Short Spider Cable Connector

4Way Long Spider Cable Connector

Allowing up to four LED Light Panels to be linked together and run from a single power supply, spider connectors are available in two wire lengths. The short four-port spider links together panels positioned in close proximity, whilst the long spider features four-ports, each with a wiring range of 1500mm. Energy efficiency is maximized by utilising the LED load on the driver, whilst reducing the number of driver units required overall. Testing has been completed to ensure voltage drops do not occur when using the spider connectors with LED Light Panel and that even over distance the unit's brightness is not affected.

4. ACCESSORIES & OPTIONS CONT.

4.3 Dimmers

4.3.1 LED Dimmer 'pot' - On / Off Push Button Rotary Dimmer Switch

Product Code: ASC – Pot –Dim

Features:

- Compact Design
- Switch On / Off without altering Dimmer Setting
- Suitable for most Constant Voltage 12vdc LED Systems

Specifications:

Input Voltage: 12vdc

Output Voltage: 12vdc, PCM

Max Current Load: 5A

Size Foot Print: 25mm x 56mm

Working Temperature: -10 to +60 degree C

Mounting Hole: 10mm

Spindle Shaft Diameter: 6mm

Suggested minimum mount depth: 28mm

Wiring Diagram:

See underside of unit for terminal details

Finished Package:

(The circuit board is mounted within a plastic housing box).

Black Box Dimensions:

75mm long x 50mm wide x 27mm high (black box height) (47mm overall height = black box & pot switch)

Black Box Wiring:

From the box through grommets is a wire extension with barrel connectors.

4.3.2 LED Dimmer: 0-10v unit

Product Code: ASC – 0-10v –Dim

Features:

- Compact Design
- Interface to 0-10v control systems
- Suitable for most Constant Voltage 12vdc LED Systems

Specifications:

Supply Voltage: 12vdc

Output Voltage: 12vdc, PCM

Control Voltage: 0-10v

Max Current Load: 5A

Size Foot Print: 25mm x 56mm

Working Temperature: -10 to +60 degree C

Suggested minimum mount depth: 28mm

Wiring Diagram:

See underside of unit for terminal details

Finished Package:

75mm long x 50mm wide x 27mm high

Black Box Dimensions:

75mm long x 50mm wide x 27mm high (black box height) (47mm overall height = black box & pot switch)

Black Box Wiring:

From the box through grommets is a wire extension with barrel connectors. To the side is a grommet hole for the lighting system interface connection.

4. ACCESSORIES & OPTIONS CONT.

4.3.3 LINEARdrive DC - Constant Voltage LED Driver/Controller

LINEARdrive DC Series

LINEARdrive DC is a highly integrated, enclosed and easy to configure constant voltage driver/controller for low-power, indoor LED lighting applications requiring up to 24A.

LINEARdrive DC can be integrated within a network or used as a standalone device. ShowMaster, supported on all eldoLED driver/controllers, can be used to upload show sequences for use in standalone mode. Show sequences can be created and managed with the TOOLbox and freely available PC software.

LINEARdrive DC is DMX, DALI and LedSync compatible, allowing 15-bit dimming, colour control and bidirectional communication for driver configuration and temperature read-out.

LINEARdrive 180/720

LINEARdrive 180 can supply up to 6A and LINEARdrive 720 up to 24A. LINEARdrive DC is broadly applicable as it supports low-power LED applications in DMX, DALI or 0-10V environments. LINEARdrive 180 supports DMX and 0-10V, LINEARdrive 720 supports DMX, 0-10V and DALI.

Setup

LINEARdrive DC is configured using its intuitive, 3-button user interface with display. The easy to navigate menu allows parameters to be set, such as the number of channels, DMX or DALI settings for networked mode, and show/colour/dim values for standalone operation. The driver's configuration can be locked to perform a visual test run of the connected LED groups.

Robust thermal management

Built-in over temperature protection protects the LINEARdrive DC against overheating.

Low EMI

LINEARdrive DC's EMI is very low due to the implementation of slew-rate controlled dimming and shielded conductors.

Easy to connect

Removing LINEARdrive DC's top cover exposes self-explanatory connections. The spring-cage connectors for LEDs, power and network leads are all clearly marked. Strain reliefs prevent leads from being pulled out accidentally.

Advantages

- LINEARdrive 180 supports up to 1.5A per channel (RGBW, 4 channels) or 2A per channel (RGB, 3 channels), LINEARdrive 720 supports up to 6A per channel
- DALI, DMX and 0-10V compatible
- Unprecedented ease of configuration
- Extremely smooth dimming and fine colour mixing. 15-bit control resolution for each LED group
- ShowMaster: user-definable show sequences
- Very low EMI
- Compact form factor: 3x50x23mm/6.02"x1.97"x0.91"

Electrical data

Maximum load:

- LINEARdrive 180: 6A, irrespective of PSU voltage
- LINEARdrive 720: 24A, irrespective of PSU voltage

Maximum load per output channel:

- LINEARdrive 180: 4x1.5A or 3x2A
- LINEARdrive 720: 4x6A

Operating supply voltage range: 12V-28V DC

Processor: eldoLEDFluxLogic 850 Series

Independent LED groups: up to 4

Dynamic effects

- HydraDrive Algorithm Based Modulation
- Control of channel 1 (R), 2 (G), 3 (B) and 4 (W/A): 0 - 100% in 15-bit set point resolution
- Contrast ratio: up to 2,000:1

Thermal data

- Cooling LINEARdrive 180: passive (integrated heat spreader)
- Cooling LINEARdrive 720: second heat spreader on LINEARdrive 720 ensures ease of mounting onto required heat sink
- Built-in protection against overheating of driver/controller

Network control

- Network input: USITT DMX512A, LedSync or DALI (DALI only on LINEARdrive 720)
- Network output: LedSync, DALI (DALI only on LINEARdrive 720)
- DMX/LedSync: 8ms update rate, compatible with 8 and 16 bit network resolution
- LedSync: bidirectional communication for temperature read-out and driver configuration. For driver configuration, use the TOOLbox and freelyavailable PC software

ShowMaster

- Nine standard shows or up to 20 customer-defined shows set at factory
- User-defined shows (ShowMaster): up to 20 shows, via TOOLbox and PC software
- Show selection: via menu buttons

Environmental ratings

- Ta range: -20°C...50°C (-4°F...122°F)
- Tc max: 65°C (149°F)
- T heat sink max: 60°C (140°F)
- Relative humidity: non-condensing mounting data
- Mounting orientation: any
- Mounting holes: for M4 screws (4)

Certifications

- CE: IEC 61347, EN 55015, IEC 61003, EN 61547
- UL

User interface

- Menu buttons: M, - and + (3)
- Display: segmented (4 x 16)
- Modes: colour/show/DMX/DALI (DALI on LINEARdrive 720)
- Features: setup, lock, reset

Connectors LINEARdrive 180

- VDC: + and - (2)
- DMX in: +, - and shield (3)
- LedSync thru: +, - and shield (3)
- EXT in: + and - (2) for 10kΩ potentiometer, 0-10V or show switch
- LED groups: - for group 1 through 4 (4)
- LED supply: + Connectors LINEARdrive 720
- VDC: + and - (2)
- DMX in: +, - and shield (3)
- LedSync out: +, - and shield (3)
- DALI: DA+ (2) and DA - (2)
- EXT in: + and - (2) for 10kΩ potentiometer, 0-10V or show switch

- LED groups: GND and - for group 1 through 4 (8)

Dimensions

- LxWxH: 153 mm x 50 mm x 23 mm 6.02" x 1.97" x 0.91"

5. TECHNICAL DATA CONT.

5.4 IP 67 Ratings

LED Light Panel has a resistance that achieves Ingress

Protection Test rating of IP 67 and IP 68

LED Light Panel can be completely protected from dust and sustain certain periods of immersion under pressure.

* Standard LED Light Panel has NO IP rating. LED Light Panel IP-67 rating can be made upon special request.

Understanding of IP Ratings

Example of rating: IP 67

First number (Protection against solid objects)	Definition	Second number (Protection against liquids)	Definition
0	No protection	0	No protection
1	Protected against solid objects over 50mm (e.g. accidental touch by hands)	1	Protection against vertically falling drops of water
2	Protected against solid objects over 12mm (e.g. fingers)	2	Protected against direct sprays up to 15° from the vertical
3	Protected against solid objects over 2.5mm (e.g. tools and wires)	3	Protected against direct sprays up to 60° from the vertical
4	Protect against solid objects over 1mm (e.g. tool, wires and small wires)	4	Protected against sprays from all directions - limited ingress permitted
5	Protected against dust - limited ingress (no harmful deposit)	5	Protected against low pressure jets if water from all directions - limited ingress permitted
6	Totally protected against dust	6	Protected against strong jets of water e.g. for use on shipdecks - limited ingress permitted
	2265	7	Protected against the effects of temporary immersion between 15cm and 1m. Duration of test: 30 minutes
	2216	8	Protected against long periods of immersion under pressure

5.4 IP 67 Rating

TEST REPORT <i>for Degree of protection provided by enclosures(IP Code)</i>		
★ REPORT NUMBER : R1454-425/12-OCT-2006 ☆ STANDARD : 1. <u>KS C IEC 60529 (2002)</u> 2. <u>IEC 60529 (2001)</u> ☆ MODEL/TYPE DESIGNATION : <u>I.SIP67(DC 12V, 0.23mA×15)</u> ☆ IDENTICAL(EXTENSION) MODEL : <u>N/A</u>		
1. General requirements for tests 1. ATMOSPHERIC CONDITIONS FOR WATER OR DUST TESTS 1.1 Temperature range : <u>15 ℃ to 35 ℃ → 22.0 ℃</u> 1.2 Relative humidity : <u>25 % to 75 % → 57 %</u> 1.3 Air pressure : <u>86 kPa to 106 kPa → Good</u> 2. TEST SAMPLE 2.1 The number of samples : <u>1 EA</u> 2.2 Conditions for mounting, assembling and positioning of the samples : <u>N/A</u> 2.3 The pre-conditioning : <u>N/A</u> 2.4 Whether to be tested energized or not : <u>NOT</u> 2.5 Whether to be tested with its parts in motion or not : <u>NOT</u>		
Characteristic numerals	Test Method & Record	Results
2. Tests for protection against solid foreign objects indicated by the first characteristic numeral		
★ First Characteristic numerals : 6	1. CONDITIONS 1.1 Talcum powder(mesh) : <u>Wire diameter=50μm, width between wires=75μm</u> 1.2 Amount of talcum powder of the test chamber : <u>2kg per cubic meter</u> 2. TEST 2.1 Volume of the enclosures : <u>about 0.1 m³</u> 2.2 Reduction air pressure : <u>-20 mbar (-200 mmH₂O)</u> 2.3 Flow rate : <u>0.0 LPM</u> 2.4 Extraction rate per hour : <u>0 volumes/h</u> 2.5 Test duration : <u>8 hours</u>	PASS
3. Tests for protection against water indicated by the second characteristic numeral		
★ Second Characteristic numerals : 7	1. CONDITIONS 1.1 The lowest point of enclosure (1,000mm) : <u>1,000mm</u> 1.2 The highest point of enclosure (150mm~1,000mm) : <u>750mm</u> 1.3 Differential temperature of water and enclosure (less than 5K) : <u>about 1.5 K</u> 2. TEST 2.1 The duration of the test is : <u>30 min</u>	PASS
☆ Checked by Chang-Ho, Kim : Signature ☆ Date (DD-MM-YY) : <u>12-OCT-2006</u>		

6. GENERAL SAFETY INSTRUCTION

6.1 Guide

Thank you for purchasing LED Light Panel. This technical manual explains the necessary precautions and technical specifications of the product, and includes further information on warranty procedures. The information given in this technical manual should be sufficient for the end-user to handle LED Light Panel safely.

Please be fully familiarised with the information included in this technical manual before beginning installation or use of LED Light Panel. LED Light Panel ("we", "LED Light Panel") is not liable for any damages of any kind resulting from the purchase, use or misuse of, or inability to use the product or arising directly or indirectly from the use, or loss of use of the product, or from the original purchaser's ("you", "purchaser") lack of knowledge or comprehension, including incidental, special, consequential or similar damages, or loss of anticipated profits or benefits. Also be aware that LED Light Panel is not liable for damages arising from any sort (including negligence or gross negligence) on the part of the purchaser or faults in this technical manual. If in doubt please contact LED Light Panel.

6.2 General Instruction for LED Light Panel

6.2.1 Warnings

1. DO NOT disassemble LED Light Panel.
2. DO NOT apply AC power or any other DC power to LED Light Panel which isn't described in the electric information label.
3. DO NOT drop or bend LED Light Panel.
4. DO NOT tamper with LED Light Panel from its original form.
5. DO NOT pull on the power wire.
6. DO NOT adhere graphics directly to LED Light Panel.
7. Make sure LED Light Panel is functioning correctly prior to assembly with or without other products.
8. When handling LED Light Panel or any of its components prior to assembly, always wear cotton gloves or the equivalent to prevent scratching or staining (e.g. fingerprints) on the LGP.
9. DO NOT use any form of alcohol or solvent to clean the LGP or any component in direct contact with the LGP (see section 2.1.).
10. DO NOT remove the Aluminium Heat Sink Plate from the LED Light Panel.

6.2.2 Electric Wiring

1. LED Light Panel is powered by a DC 12V (constant voltage) adaptor. Warranty is void if any other adaptor that is not approved by LED Light Panel is used.

2. Any adjusted cord from the adaptor to LED Light Panel should be kept as short as possible to avoid a voltage drop of LED Light Panel.

3. One adaptor can supply power to multiple LED Light Panel units providing the total wattage is less than the capacity of the adaptor. Multiple LED Light Panel units may be connected by using a spider connector cable.

4. If multiple LED Light Panel units are wired to one adaptor, connect them in a "parallel" not as a "series" to avoid voltage drop and maximize light output.

5. Never apply AC power directly to LED Light Panel as this will instantly damage LEDs.

6.2.3 Protective Film

Prior to installation of LED Light Panel please ensure the clear protective film has been removed from the face of the unit. Failure to remove the protective film will affect the brightness, clarity and even illumination of LED Light Panel.

6.2.4 Cleaning

1. White cotton gloves should be worn to prevent scratches or fingerprints on the acrylic surface.
2. If fingerprints or other substances are visible on the acrylic surface, gently wipe off with a non abrasive cloth soaked in a watered down thinner.

3. With the cross section cut by a laser, the acrylic surface may crack if excessively exposed to thinner or alcohol.

6.2.5 Moving

1. Please DO NOT HANDLE the acrylic plate as below when lifting up. The LED module embedded within the acrylic plate will be damaged.

2. LED Light Panel should be placed on a clean and flat surface. (See picture below)

3. The longer side of LED Light Panel should be lifted up slowly. DO NOT bend LED Light Panel when lifting. Lift LED Light Panel in a vertical position, keeping the unit straight and supporting each corner to maintain rigidity. (See picture below)

4. Do not cover the metal heat sink. The exposed metal on the back of the LED Light Panel allows the heat generated by the LED to be dissipated thus cooling the LED over time maximising longevity.

6.2.6 Storage

Store LED Light Panel in a dry area on a plain surface. Always keep LED Light Panel covered to protect it from moisture and dust. Keep LED Light Panel away from children.

7. WARRANTY & LIMITATION

7.1 Warranty Period

LED Light Panel – 1 year
 Power Supply - 1 year (please see our warranty terms and conditions available on request).

7.2 Operating condition

Operating Temperature: 5 ~ 35°C (41 ~ 95°F)
 Operating Time: 12 hours/day

7.3 Warranty Coverage

7.3.1 What the warranty covers

LED Light Panel and parts are warranted against defects in materials and workmanship from the date of purchase for the warranty period, provided it is used under normal conditions. During this period, defective products will be repaired or replaced without charge: the LED Light Panel

must be returned for this work to be carried out.

Under no circumstance will liability be accepted for any special, indirect, incidental or consequential damages or loss owing to failure of the product.

7.3.2 What the warranty does not cover

1. Defects in materials and workmanship after expiry of the warranty period
2. Damage caused by the following
 - Accident, abuse, misuse, misapplication, natural disaster
 - Repair or attempted repair by anyone not authorised by LED Light Panel
 - Using improper power supply
 - Inappropriate use not in accordance with instruction
 - Heavy shock
 - Normal wear
